Market Study: Hybrid Textile Printing

Opportunity for CLT in Mexico, Latin America and the U.S.

TID México · VSP Printing, Inc. · CEB | October 2026

The study on one page

~1,900

reachable companies in Mexico

82

prospects in Mexico (35 OEMs)

217

prospects in Latin America

0

formal distributors of Chinese hybrids

A market without an owner: the industry needs to stand out, and nobody in Mexico offers a hybrid solution with local chemistry and service.

Contents

06 Trade

07 Latin America and the U.S.

08 Conclusions

01

Scope and methodology

Study parameters

Parameter	What we analyzed
Market	Hybrid equipment, consumables (silicones, pastes, inks) and service; substitutes: screen, DTG, DTF, sublimation
Segments	Export contractors, industrial printers, uniforms and sportswear, brands, shops
Size	Total, reachable and capturable market (TAM / SAM / SOM)
Geography	9 regions in Mexico + Central America, the Caribbean and South America
Competition	DTG, automatic carousels, Chinese hybrids, inks and silicones
Trade	2026 tariffs, import through CEB, USMCA

Sources: CLT (website and 2025 annual report), INEGI, CANAINTEX, FESPA México, DOF, Open Supply Hub, company websites and online stores.

02

The manufacturer: CLT

CLT: a chemistry company that sells machines

2009

founded, Dongguan

¥568M

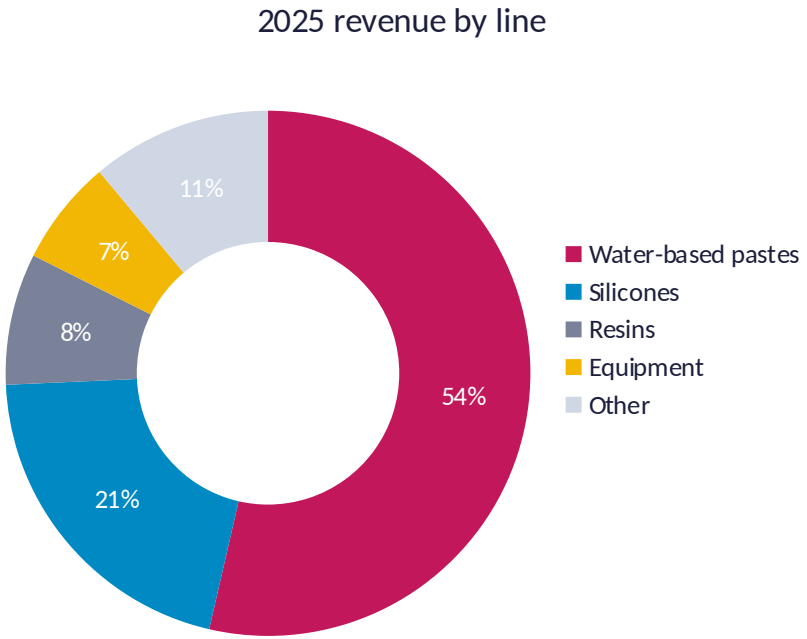

2025 revenue (~US$80M)

301618

Shenzhen Stock Exchange (ChiNext)

18%

export sales

Source: CLT 2025 annual report

CLT portfolio relevant to Mexico

1 Hybrids

CLT-012R/015R/018R (Ricoh, 450 pcs/h) and CLT-014B/016B/018B (Brother, 400 pcs/h)

2 Oval carousels

SM45-85, SM60-85, SM70-95: up to 800 pcs/h, ±0.02 mm

3 DTG and DTF

6-station DTG with inline pretreatment; industrial DTF CLT-6900

4 Chemistry

3D, glass and special silicones (S-1701, S-1703, S-1704-1, S-1714-1); water-based pastes

Certifications stated by CLT: OEKO-TEX, GOTS, ISO 9001 and ISO 14001.

Hybrid technology: the best of two processes

1 Screen base

White and effects with low-cost paste: puff, foil, glitter, discharge

2 Digital color

Ricoh or Brother heads: photographic gradients, unlimited colors

3 Special effects

Glass-like, embroidery-like or 3D silicone over the print

400–450

pieces per hour

40–70%

ink savings vs DTG

500–5,000

pieces: profitable run

How CLT sells today

1 Live-demo trade shows

Tests on the customer's fabric and same-day quote

2 Turnkey package

Machine, chemistry, installation, training and logistics

3 Phased investment

Press first, digital stations later

4 ROI-based selling

Savings in ink, operators and floor space

5 Linked consumables

Warranty with genuine chemistry and parts

6 Digital lead capture

Multilingual site and WhatsApp

Missing in Mexico: local technical service, in-country inventory, Spanish-language support and a demo showroom

Samples: unlimited digital color

Digital watercolor over white base, colored garment

Photorealism on a dark garment

Full-color photographic collage

Breathable digital print

Samples: special effects and uniforms

High build, puff and cold foil

Sports crest with relief and shimmer

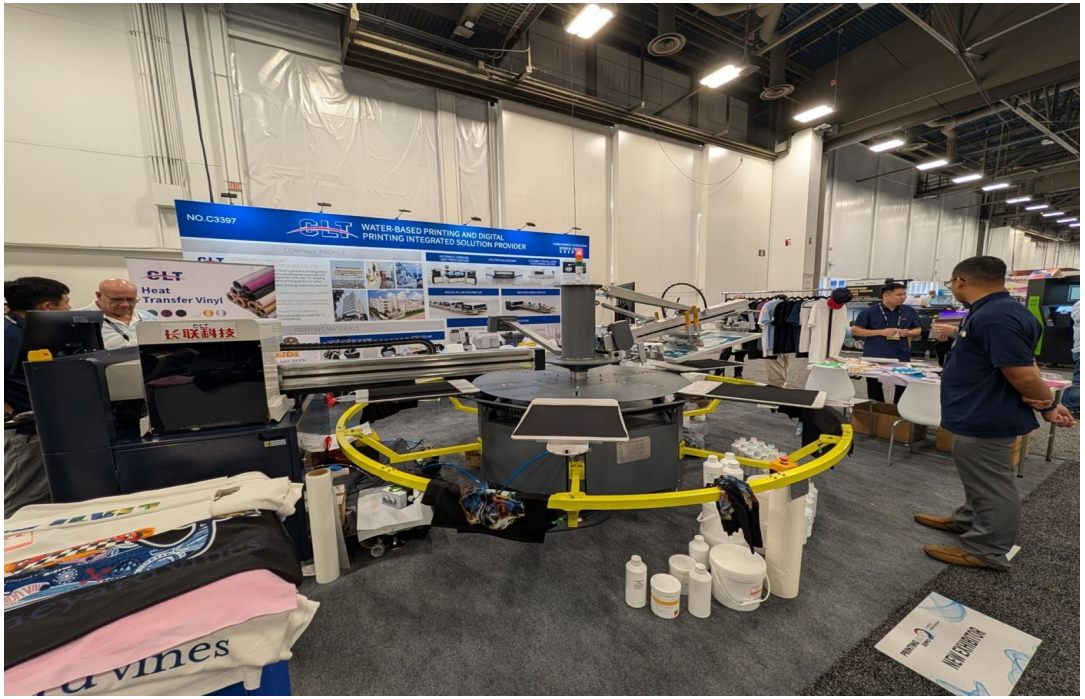

Spot-color screen print on colored garment

Relief, gold foil and metallic sparkle

Market size

~102,500
Total market: all textile businesses

~1,400–1,900
Serviceable: medium/large firms and shops with carousels

30–90 lines
Obtainable in 5 years (2–5% adoption)

US$3.6–22M

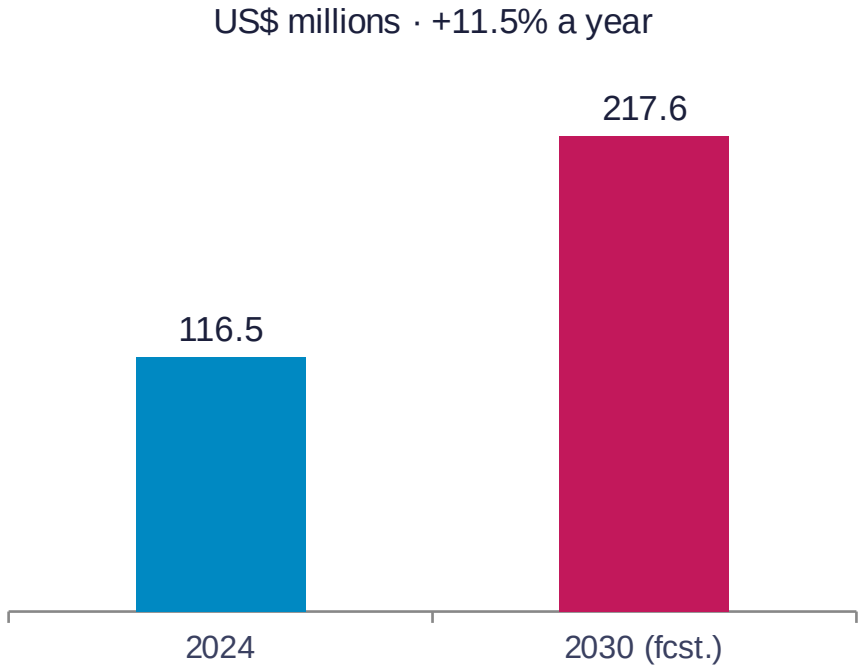

in equipment over 5 years

US$0.9–3M

per year in consumables (50 lines)

Estimate — to be confirmed with CLT's quotation

Market value: digital textile printing in Mexico

74%

direct to fabric (roll) in 2024

DTG

direct to garment: the fastest-growing segment

~60%

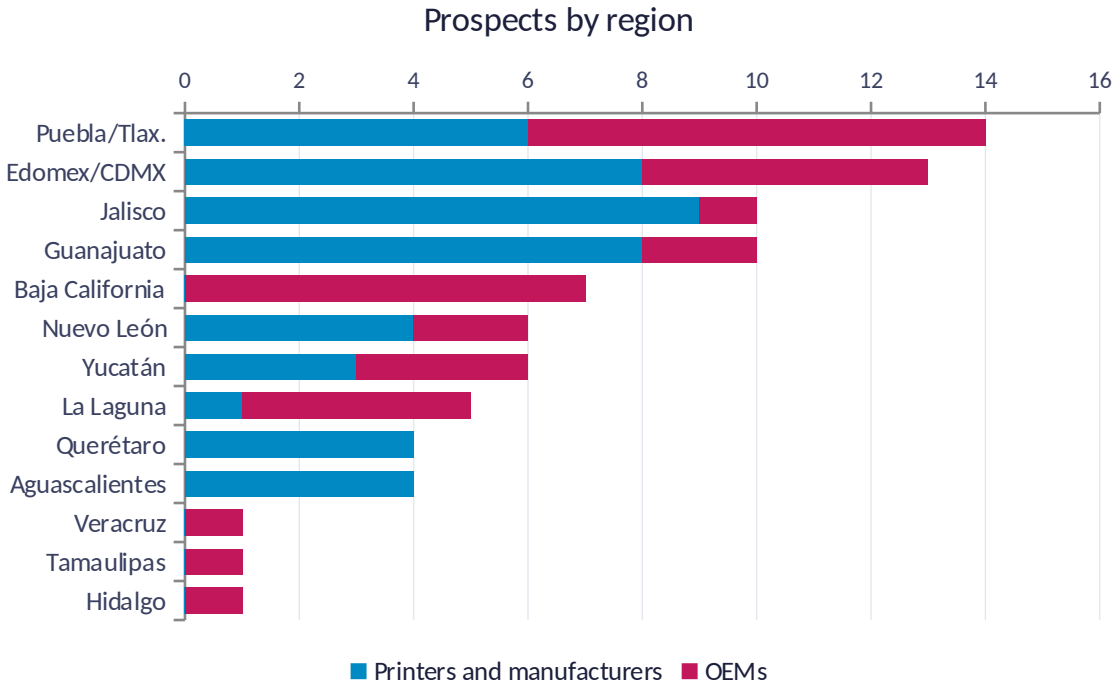

Epson in digital, per Epson

Source: Grand View Research (2024–2030); Epson at FESPA 2026. Digital printing only: excludes the screen printing and chemistry CLT also sells.

Priority regions

1	**State of Mexico & CDMX**	Printers, brands, promotional
1	**Jalisco**	Fashion, sportswear, domestic brands
1	**Baja California**	Export screen printing; TID + VSP at the border
2	**Puebla & Tlaxcala**	Export maquila, knitwear
2	**Guanajuato**	Knitwear, wholesale; 1–2 h from TID
3	**Laguna, Ags., N.L., Yucatán**	Denim, IMMEX, uniforms

82 prospects in 13 regions of Mexico

17

priority A

33

priority B

35

export OEMs

04

Priority accounts

80/20: printers and manufacturers (9 of 47)

Company	City	What they do
ADN Serigrafía	Naucalpan, Edo. Méx.	Contract screen printing: 130,000+ pcs/week, up to 18 colors, production for the U.S. and Canada
Serigrafía Textil Automatizada (KW)	Puebla, Pue.	Automated volume screen printing: campaigns, sportswear and promo; 30+ years
Manufacturas Textiles RF (Reitex)	Guadalupe, N.L.	Integrated yarn-to-garment plant; high-volume campaign and promo T-shirts
Diermi (Playeras Mindy)	Zapopan, Jal.	Sports and promo T-shirts in a 5,000 m² automated plant; exports to the U.S.
GOCA'S	Ciudad de México	Large-scale T-shirts and hoodies with in-house screen, sublimation and embroidery; 25+ years
SerigrafiarteSP	Ciudad de México	Contract screen printing (plastisol, water-based, discharge), DTF and sublimation for factories and brands
Grupo Martex	Naucalpan, Edo. Méx.	High-volume textile maker; uniforms (directory cites FIFA uniforms)
Uniformes Carmen	Guadalajara, Jal.	Uniforms with screen, embroidery and transfer; volume print contracting; 30+ years
Charly (Grupo Charly)	León, Gto.	Sports brand: jerseys and licensed apparel for Liga MX clubs (León, Pachuca, Atlas, Santos)

17 of 82 accounts (20%) receive the year-1 sales focus

80/20: export OEMs (8 of 35)

Company	City	Brands and customers
Vertical Knits	Baca, Yuc.	Nike, Fanatics, Tommy Hilfiger, Patagonia
Ink Throwers de México	Tijuana, B.C.	Disney, Levi's, Marvel
MD International Baja	Ensenada, B.C.	Fanatics, Hurley, REI
Fortune Fashions Baja (Mad Engine)	Ensenada, B.C.	Mad Engine Global, Disney
SOIR Textiles (TJ Factory Clothing)	Ensenada, B.C.	Columbia, Disney
Factory 1 (Factory1 Group)	Ensenada, B.C.	Columbia, Disney
Codipsa (San Fernando ScreenPrinting)	Puebla, Pue.	Puma, Gap, Hot Topic, Macy's, Disney
Industrias Manufactureras MYR	Irapuato, Gto.	adidas, Puma

17 of 82 accounts (20%) receive the year-1 sales focus

05

Competition

Competition: the gap is local service

Type	Players	Reading
High-end DTG	Kornit (Sun Digital México)	High investment
Automatic presses	M&R, ROQ, MHM, Anatol	Customers for digital stations
Chinese hybrids	Textalk, Hanglory	No visible local structure
Inks & silicones	ScreenTec, Avient, Matsui	Price vs. brand approvals
Substitutes	DTF, sublimation	DTF growing in short runs

Competitors in inks, pastes and silicones

Brand (origin)	Reference price	Threat
Avient: Wilflex, Rutland, Union Ink, Printop (U.S.)	High: ~US$40–60/gallon for mixing colors; specialties US$90–310/gallon (U.S. stores)	High with OEMs
Grupo Sánchez / ScreenTec: Seritex, Aquatex, Siltex (Mexico)	Low: MXN 159–217/kg retail (Seritex)	High with shops
Matsui (Japan)	Mid-high; bases from ~US$8–9/kg in Central America	Mid-high
International Coatings (U.S.)	Mid	Mid
Marabu (Germany)	High	Low: limited textile range (nylon, synthetics)
RUCO / RUCOINX (Germany)	High	Low: industrial inks for plastic, glass and metal
Tampoprint (Germany)	High	Low: tagless labels only
Low-cost Mexican brands: Dyssa, Celi Colors, Quitexa, De la Rana	Very low: plastisol white ~MXN 790/gallon	Mid with small shops
Direct Chinese suppliers (Alibaba)	Very low: silicone ~€3.5–5.2/kg	Mid: same origin as CLT

Comex does not make textile screen printing inks: it is an architectural paint brand. Public prices as of October 2026, for reference only; CLT's price for Mexico is to be confirmed.

SWOT by competitor

Competitor	Strengths	Weaknesses	Opportunity for CLT	Threat to CLT
Avient (Wilflex, Rutland)	Global brand; certified inks approved by brands; full range	High price; imported; very expensive specialties	Silicones and special effects at a lower price; water-based	Export brands already have approved inks: switching is slow
Grupo Sánchez / ScreenTec	Domestic maker; low price; dealer network; Siltex silicones	No machines or hybrid line; focus on the domestic market	Turnkey package: machine + chemistry + service	Price war in consumables
Matsui	Benchmark in water-based, discharge and specialties	Imported; mid-high price	Water-based pastes are 54% of CLT's sales	Already inside large contractors and shops
Marabu, RUCO, Tampoprint	German quality; strong in graphics, pad printing and industry	Little offer for garment printing	Not head-on competitors in apparel	Tagless label and synthetics niche
Low-cost Mexican brands	Very low price; sold in every store	Uneven quality; no certifications or technical support	Growing shops that need consistent quality	Price war in small shops
Direct Chinese suppliers	Lowest price	No service, no local stock, no warranty	Local service, stock and Spanish-speaking technicians	Same origin: customers compare price against CLT

SWOT: CLT + TID position against the competition

Strengths

- Only turnkey offer: hybrid machine + chemistry + service
- CLT chemistry priced below premium brands
- Service in Mexico and the U.S.; own importer (CEB)

Weaknesses

- CLT brand little known in Mexico
- No export-brand ink approvals yet
- Textile team still to be built

Opportunities

- 2026 tariffs on Chinese apparel: more local production
- Export OEMs want high-value effects
- Few local suppliers of silicones and special effects

Threats

- Avient tied to brands' approved-ink lists
- Low prices from ScreenTec and Mexican budget brands
- DTF in short runs
- Tariffs on Chinese inputs

06

Trade

Import and regulation

1 CEB imports

Group company incorporated in Mexico; direct China → Mexico shipping

2 2026 tariffs

5–50% on non-FTA countries; confirm lines 8443, 3215 and 3910

3 16% VAT

Creditable: affects cash flow, not cost

4 USMCA

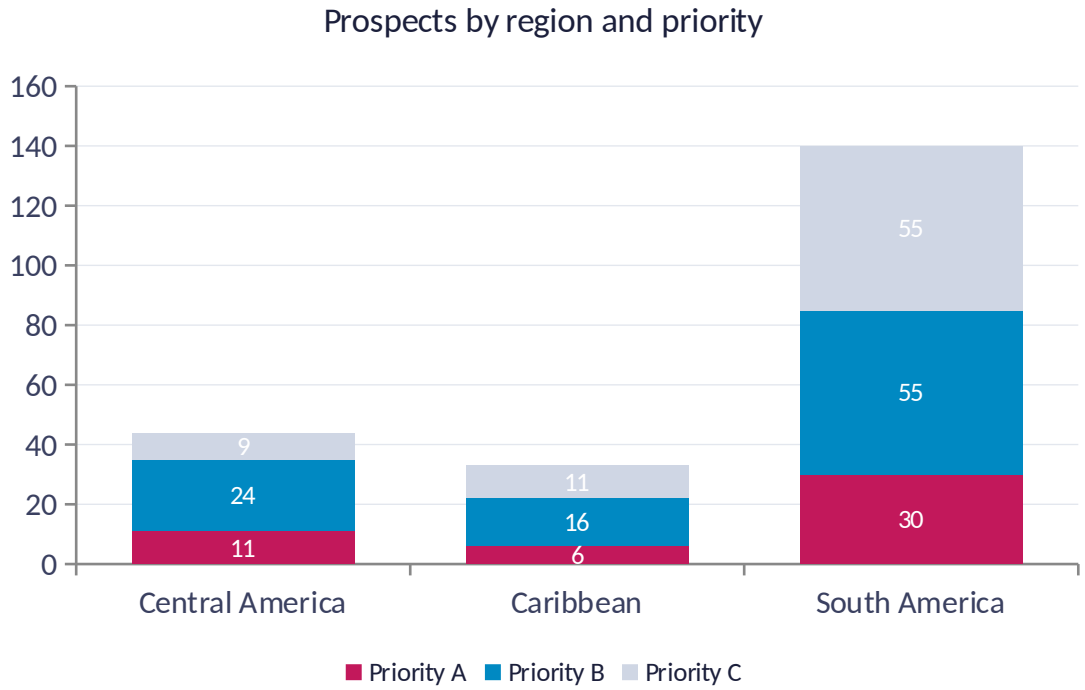

Maquiladoras require OEKO-TEX and fast response

07

Latin America and the U.S.

Latin America: 217 prospects in 16 countries

47

priority A

44

Central America: contractors for U.S. brands

62 + 51

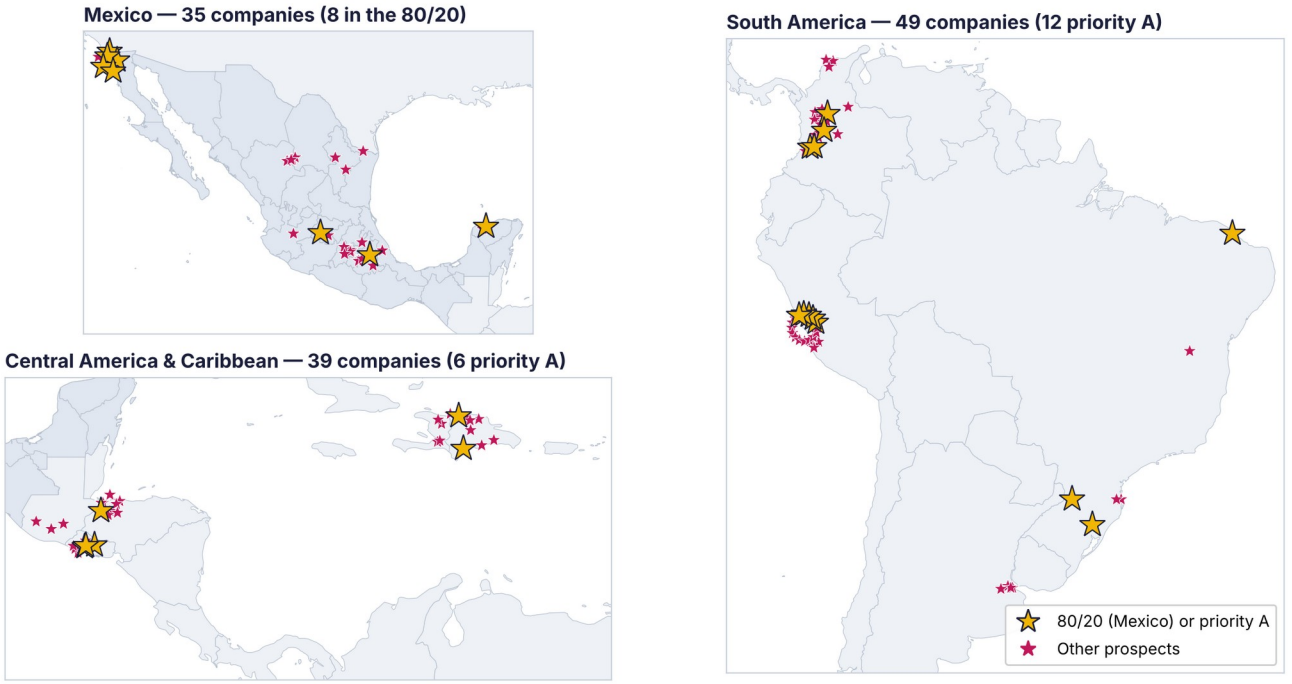

Colombia and Brazil

Latin America: priority A accounts

Company	Country	Type
TCPL The Caribbean Print Limitada S.R.L.	República Dominicana	Contract printer
The Willbes Dominicana Inc.	República Dominicana	OEM / full-package contractor
The Willbes Haitian	Haití	Contract printer
Cygnus Investments	El Salvador	Contract printer
Techno Screen	El Salvador	Contract printer
ACSA Colors Printing	Guatemala	Contract printer
Topy Top	Perú	OEM / full-package contractor
Industrias Nettalco	Perú	OEM / full-package contractor
Grupo Malwee	Brasil	Marca de moda
Lunelli	Brasil	Marca de moda
Grupo Kyly	Brasil	Marca de moda
Brandili Têxtil	Brasil	Marca de moda

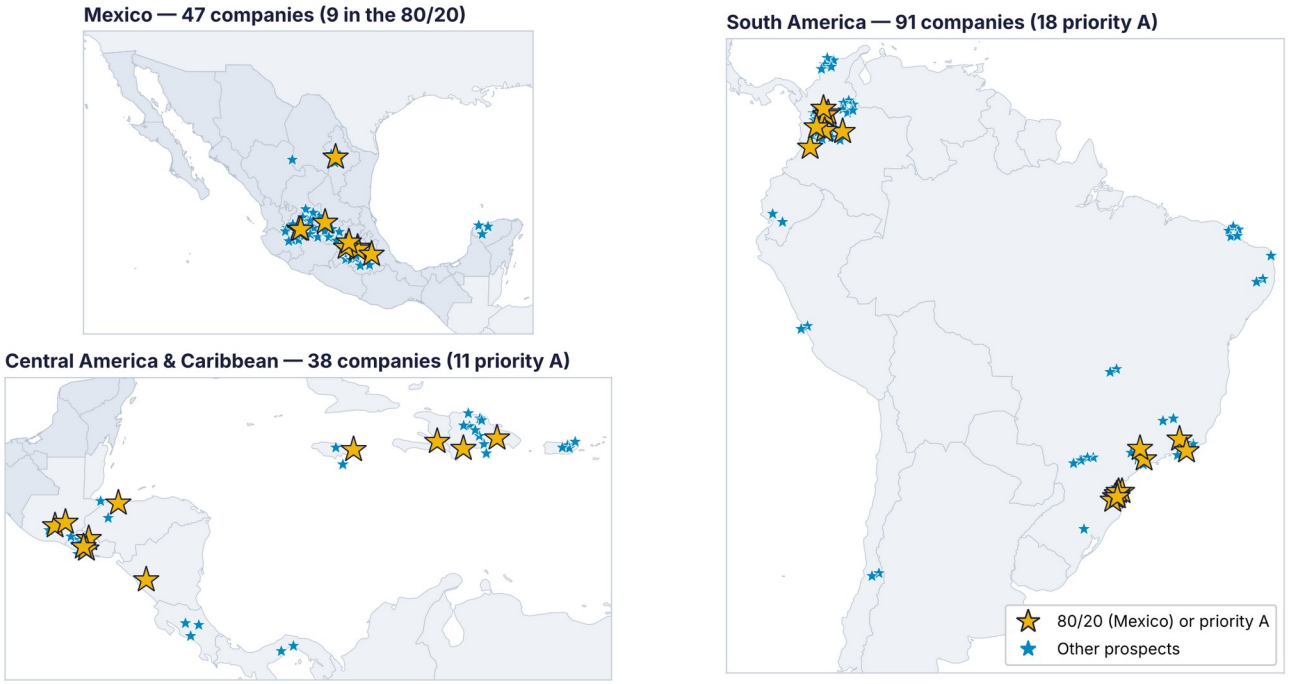

Focus accounts first (volume printing or M&R / hybrid equipment); the rest of priority A is in the workbook.

LATAM map: OEM prospects (export contract manufacturing)

Gold star: 80/20 account in Mexico or priority A elsewhere in LATAM. Numbered account list in the Mapas sheet of the marketing plan workbook.

LATAM map: printers and manufacturers

Gold star: 80/20 account in Mexico or priority A elsewhere in LATAM. Numbered account list in the Mapas sheet of the marketing plan workbook.

Expansion path

1 **Wave 1 · years 2–3**

El Salvador, Honduras, Guatemala

Contractors printing for Hanes, Gildan, Tegra; sold from Mexico

2 **Wave 2 · year 3**

Peru and Colombia

Export cotton and knitwear; local agent with TID support

3 **Wave 3 · years 3–4**

Dominican Rep., Haiti and others

Free zones with screen printing (Gildan, Hansae)

U.S.: VSP Printing (California) provides local service and covers OEM headquarters; CLT already exhibits at PRINTING United.

08

Conclusions

Conclusions

1. Mexico’s industry must stand out against imports: hybrid printing answers that need.
2. The reachable market is concentrated (~1,900 firms): it is won with consultative selling to a few large accounts.
3. Nobody owns the category: no formal distributor of Chinese hybrids and no turnkey offer with local service.
4. Ink competition is premium (Avient, Matsui) or cheap (ScreenTec, local brands): CLT competes with package and service.
5. 2026 tariffs and USMCA favor producing in Mexico; Central America and Peru are the next wave.

Recommendations and next steps

1. Formal CLT quotation to replace estimates
2. Validate consumption and prices with 10–15 shops
3. Open the demo room and work the 17 80/20 accounts
4. Confirm tariffs and HS codes with a customs broker
5. Prepare the Central America entry (year 2)

Thank you
